

# Public Rabies Dashboard Guide

## Basics of the Public Rabies Dashboard

The Public Rabies Dashboard will display **cumulative** rabies cases by month, counties, and regions in a selected year.

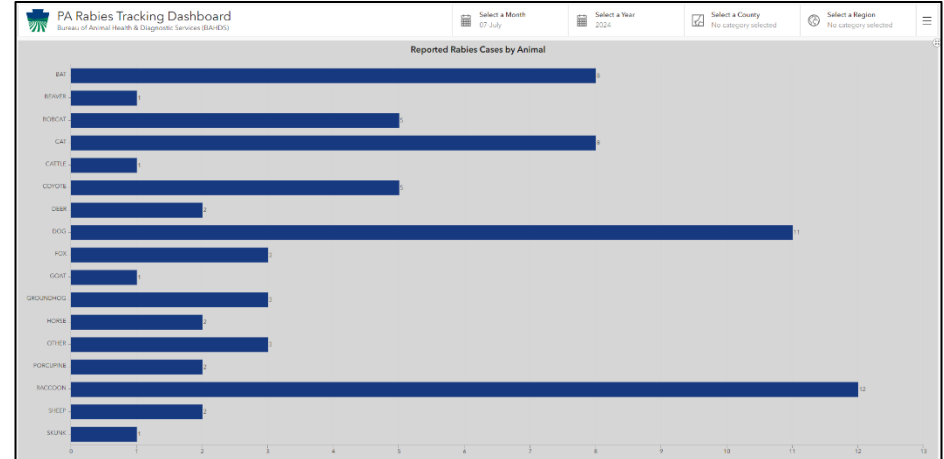

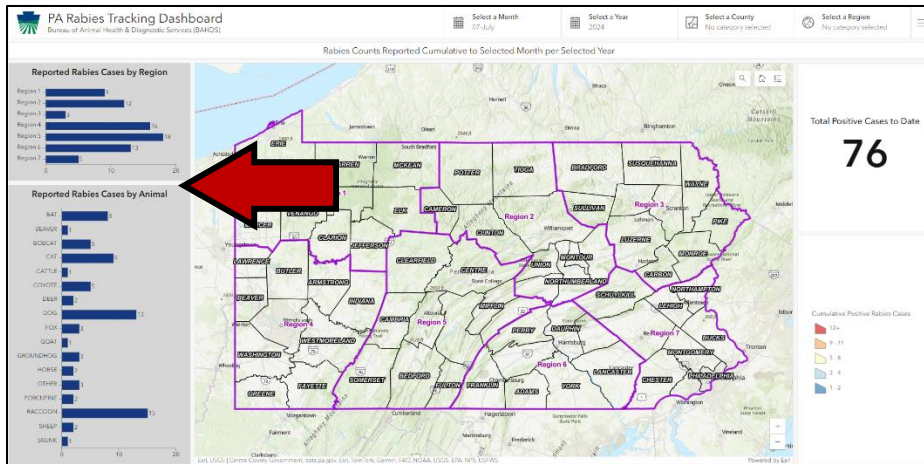

Zoom Controls

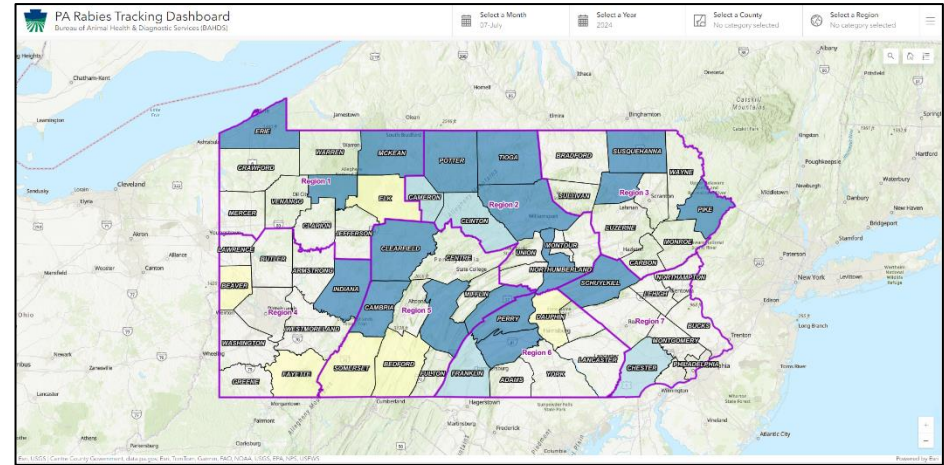

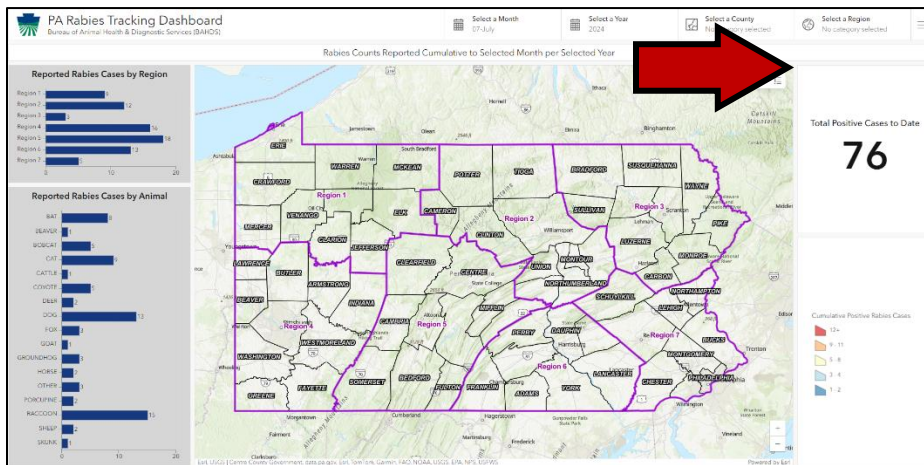

Map Legend

# Navigating the Public Dashboard

Each chart can be expanded to show a full screen version using the expand button  that appears when hovering over the chart.

The central map can also be expanded to show a full screen version using the expand button  that appears when hovering over the map window.

Category selectors at the top of the dashboard will allow you to choose cumulative rabies cases viewable by the month, year, county, and region. For instance, selecting July and 2024 will display all cases from 1/1/2024 to 7/31/2024 (or the current day in July).

Select a Month: 07-July | Select a Year: 2024 | Select a County: No category selected | Select a Region: No category selected

### Example:

In the example to the below, Chester, Lancaster, and York Counties are selected for September 2023. The surrounding charts and indicators now show cumulative rabies cases, by the selected Counties, up to the selected date.
